

Chrones Disease

Last year 2000, I suffered from a bad attack of Bronchitis which put me in hospital and subsequently I found that as an after effect I developed a form of progressive neuropathy which meant that my legs and feet were extremely painful and in fact virtually stopped working altogether.

I spent some two weeks in Hospital and six months recuperating from this condition. In about July I started taking Herbalife products (F1, F2, F3, N.R.G. and Roseox).

Now I was a little dubious about these 'Herbal things' as I was taking a bucketful of prescription drugs and have suffered from Ulcerative Colitis and subsequently Chrones disease for some 10 years. I could not believe the transformation in my energy levels and feeling of wellbeing that affected me in just a few weeks. I also started to take the Aloe Vera concentrate for my digestive system and feel 100% better than this time last year. My weight is under control, my chrones disease is comfortable and the neuropathy is virtually non-existent.

I now walk a couple of hours each day during the week handing out flyers for my new Herbalife business and thoroughly enjoy the business.

I cannot recommend Herbalife products highly enough to chrones sufferers and anyone else wanting to improve their general wellbeing, be it weight loss or otherwise. My Specialist could not believe my Blood Test results at the last meeting. He has been caring for my condition since it began some 10 years ago and admits he has never seen my results looking so good!

Hope this helps to allay the fears of people considering using Cellular nutrition as a way of improvement.
